# SAINT PETERSBURG COLLEGIATE STEM HIGH SCHOOL EVALUATION: 2022-2023 SCHOOL YEAR

---

The 2022-2023 school year was the first year of operation for Saint Petersburg Collegiate STEM High School.. In this first year of operation, SPCHS-STEM focused on students accomplishing goals necessary to advance toward the goal of earning both a high school diploma and Associate in Arts degree. Goals for assessment passage were based upon a review of the current cohort. An 85% passage rate for college courses and a 20% chronic absentee rate were set as reasonable baseline goals given student performance at comparable charter schools (SPCHS and SPCHS-N).

## CONCLUSIONS/RECOMMENDATIONS

---

Saint Petersburg Collegiate STEM High School met 4 of 5 goals for the 2022-2023 school year. 94% of freshmen scored 3 or above on the FAST PM3 assessment. 100% of sophomores were assessed as college ready. Students earned a grade of 'C' or higher in 94% (85 of 90) of their college courses. The chronic absentee rate at SPCHS-STEM was 3.3%. Each of these goals were met. Goal 2 was not met as 77% of sophomores (10 of 13) scored 3 or above on the FAST PM3 assessment.

Students at SPCHS-STEM achieved near ceiling levels of performance across all goals except Goal 2. Goal 2 not being met was a function of small sample size coupled with the transfer of 3 students out of the program due to family relocation. The difference between meeting and not meeting Goal 2 was a difference of 1 student.

For the 2023-2024 school year, goals should be consistent with SPCHS-STEM's high expectations while allowing for yearly variability associated with small sample size. SPCHS-STEM is encouraged to set goals for the 2023-2024 school year across metrics that are challenging based upon expectations of the currently enrolled cohort.
